There are over 158,230 descendants of Marcos Alonso Garza Arcon in our kindred database and of those 5,328 carry his yDNA. Many but not all males with the surnames Falcon, Garza, Montemayor and Trevino are Y-DNA descendants of Marcos Alonso. The surname Garza Arcon is unique. Some have espoused that Garza Arcon should be Garza Falcon as used by Blas Garza Falcon. Three of Marcos' sons took their mother's surname Trevino (seen rarely as Temino). The surname Montemayor sprouts four generations later. This is a very different YDNA line than that of Diego Montemayor (founder of Monterrey) whose YDNA line died hundreds of years ago. Marcos Alonso's Y-DNA haplogroup is understood to be R-M269 and after Big Y DNA testing is now known as R-BY15969. Thanks to the efforts of David Reta and the FTDNA Garza DNA project for continued research on this ancestral line.
